What is a data line lightning & surge protector?

Data line lightning & surge protectors are used to protect sensitive equipment from lightning strikes and surges on the Ethernet data lines. With the introduction of faster standards like 100 and 1000 Base-T Ethernet, faster data speeds require the equipment manufacturers to use sensitive high speed components that require protection.

What is a data-line surge protection?

Modular data-line surge suppression for network, telecommunication and PC system protection. Guaranteed protection against surges spikes and lightning Professional-grade Electrical Surge Protection for Computers and Electronics The world's only surge protector to incorporate removable cable guide and rotating cord retainer.
