Cell handling, process steps and testing steps are adjusted to customer specifications and integrated. With our broad spectrum of solutions and experience, we satisfy all requirements for the reliable ...

Cell handling, process steps and testing steps are adjusted to customer specifications and integrated. With our broad spectrum of solutions ...

Discover the key features of a modern battery pack assembly line and how expert design and automation can boost performance, flexibility ...

The BMS and the battery pack end of line test system can be widely used in battery pack production lines, providing a programmable software platform and customized test items to efficiently verify ...

Discover the key features of a modern battery pack assembly line and how expert design and automation can boost performance, flexibility and output.

The BMS and the battery pack end of line test system can be widely used in battery pack production lines, providing a programmable software platform and ...

Explore the BPT Platform and how it enhances production testing for electric vehicles, increasing flexibility and efficiency.

Repower provides battery testing equipment, formation/grading systems, and automated PACK production lines. High-voltage battery solutions for global clients since 2003.

Discover automated battery manufacturing and testing solutions for modules and packs, ensuring efficiency, scalability, and high-quality production.

Immerse yourself into the realm of pack assembly and end-of-line (EOL) testing with our animation, crafted to showcase the custom solutions offered by Bosch Rexroth for battery manufacturing.
