How much power does an emergency solar power kit use?

If you need emergency power for an entire house or to support power-hungry appliances like air conditioners, you're better off with a 2000-3000W rating. The battery capacity, measured in watt hours (Wh), tells you how much energy an emergency solar power kit can store.

Can You charge a solar radio in a storm?

You can "fast charge" your emergency solar radios with the included cord before the storm hits. Or use the hand-crank to get alerts in a storm. And of course, everyday batteries work great too. No specs to check or cords to buy -- use the power inside the Liberty Band Radio to power your other USB-compatible devices in a pinch.

Why do you need an emergency solar power kit?

Having a reliable emergency solar power kit is essential for emergency preparedness, off-grid living, and safe backcountry adventures. The best kits offer a powerful source of clean, reliable energy for any non-traditional power needs.
