What is a sr55ub server rack & cabinet?

The SR55UB provides physical equipment and media security required for PCI DSS (Payment Card Industry Data Security Standard) compliance. This is essential for companies that process, store and/or transmit credit card information. We have a range of accessories designed to work with our Server Racks & Cabinets.

How does a 55u server rack work?

This 55U server rack comes fully assembled for quick and easy deployment with pre-installed (and removable) casters that let you maneuver it over a level, smooth, stable surface and through a standard seven-foot (2.1-meter) doorway into position, where it can be stabilized by adjusting the levelers (also removable).

How big is a 55u rack cabinet?

The extra height allows you to stack more equipment vertically and make optimal use of available floor space. This 55U rack cabinet has a footprint of 24 inches (600 millimeters) wide and 43 inches (1092 millimeters) deep. The reversible front door, split rear doors and half-size side panels lock securely to help prevent damage, tampering or theft.

What is a standard EIA rack?

Our Standard EIA racks deliver a simple, quick, and reliable solution, with self-squaring installation and visual RU numbering. Legrand's wall mount racks and cabinets offer a wide variety of solutions engineered to maximize protection, performance, and flexibility of network equipment and cable infrastructure.
